

STAMFORD® | AvK®

AVR - the beating heart of your alternator

One weak link is all it takes to
break your business

Counterfeit is a serious problem

Insist on genuine

One **STAMFORD®**

One Standard

Genuine since 1904

www.stamford-avk.com

Why insist on Genuine **STAMFORD®** AVR^s

- Minimise risk of plant and equipment failure
- Maximise power supply security to your customers or consumers
- Matched performance capability to alternator
- Fully compatible with machine parameters ensuring stability and responsiveness
- Tested to react in emergencies, triggering support protection systems
- All genuine **STAMFORD®** and **AvK®** AVR^s have 12 month warranty as standard

“Buying counterfeit will negate all of the set-up, commissioning, calibration, protection settings and performance verification work associated with a genuine AVR in control. Reduced short circuit capability results in an unpredictable protection system response and a potential fire hazard to your equipment... Why risk it?”

Robin Jackson – Director Global Customer Engineering Services

“Buying genuine **STAMFORD®** AVR^s gives you peace of mind knowing you have the full support of the manufacturer. Non-genuine product risks damage to your alternator not covered by **STAMFORD® | AvK®** warranty”.

John Lenton - EMEA Customer Support Leader
