

STAMFORD®

CRITICAL STANDBY POWER

Case history

RK Power Generator Corp.

Where:

Puerto Rico, USA

Specified:

**3 x STAMFORD® 500kW HC534E1
alternators with Volvo engines**

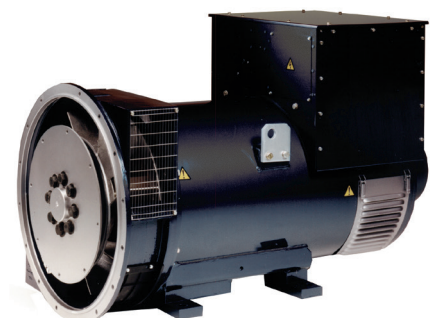

Purpose:

To provide power on the island of Puerto Rico in the aftermath of Hurricane Maria, one of the most catastrophic hurricanes to make landfall on the island in decades

In 2017, during one of the worst hurricane disasters in many years, RK Power Generator Corp. partnered with STAMFORD | AvK to provide critical power to the people of Puerto Rico.

Hurricane Maria stripped Puerto Rico of power, crippled communications, and destroyed infrastructure. "Although the government and businesses were affected, the people were the ones who suffered the most due to the hurricane", emphasized Carlos Gómez, Marketing Manager of RK Power. The most crucial challenge was to provide emergency healthcare to the population when hospitals didn't have utility power.

The need for reliable power led the Professional Hospital in Guaynabo, Puerto Rico to request 3 x 500kW standby generator sets from RK Power utilizing three STAMFORD HC534E1 alternators.

STAMFORD | AvK™
POWERING TOMORROW, TOGETHER

We sold a lot of residential units. In Puerto Rico, STAMFORD means quality! The final customer demands STAMFORD because of its quality

Ruben Aguilar, President of RK Power Generator Corp.

RK Power designs, manufactures, and services generator sets for the residential, commercial, and industrial market in Puerto Rico. Their expertise and team of qualified professionals enabled them to play a crucial role in the aftermath of the hurricane on the island. Their partnership with STAMFORD | AvK is built on the need to provide customers with reliable and quality products.

STAMFORD's standard 3 year warranty on all S-range alternators is a testament of our quality and performance. This is why RK Power has chosen STAMFORD | AvK as their primary supplier of alternators.

In the weeks following the hurricane, resuming business operations was challenging given the severely limited electric and communication systems on the island. Ruben Aguilar, President of RK Power, and his team worked tirelessly to find ways to meet customers' overwhelming demand for gensets. The collaboration and teamwork with STAMFORD | AvK was vital in ensuring inventory was replenished to meet customer demand.

STAMFORD | AvK worked diligently to get product delivered to the island expeditiously. Working through the severe conditions on the island, and teaming up with STAMFORD | AvK, RK Power aided the recovery of many homes and businesses.

In partnership with STAMFORD | AvK, RK Power offers their customers peace of mind when purchasing their gensets.

In preparation for the upcoming hurricane season, RK Power is educating customers on the importance of advanced planning to protect their homes and businesses and is holding necessary inventory to support them. STAMFORD | AvK is proud to continue supporting RK Power in powering up Puerto Rico.

We are here to support your future decarbonisation goals, through our end-to-end expertise in versatile solutions. Backed by the reassurance of our world-renowned brands recognised for reliability and complete peace of mind, we are with you on your journey towards sustainability.
